

Manager.io Expert | Cloud Accounting & Export Documentation \$20.00/hr

MANAGER.IO SPECIALIST | 40% COST REDUCTION FOR NOBIN AGRO FARM

I transform manual bookkeeping chaos into automated cloud accounting for Bangladesh manufacturing and export businesses. My clients gain real-time financial visibility, NBR compliance, and GitHub-powered data security—saving 20+ hours per month.

- ✓ VERIFIED CREDENTIALS
- Manager.io Approved Partner & Reseller
  - Trade License: TRAD-DSCC-004563-2025 (INSPIRON TECH)
  - e-TIN Registered with NBR
  - 3+ Years Cloud Accounting Implementation Experience
  - GitHub Automation Specialist
  - Active partnerships: Dub.co, Proton, Upwork

✓ PROVEN RESULTS: NOBIN AGRO FARM CASE STUDY

One of my flagship implementations transformed a traditional aquaculture operation into a data-driven enterprise:

CHALLENGE: Manual pond leasing, batch tracking, and financial reconciliation causing 60+ hours/month overhead

SOLUTION: Custom Manager.io implementation with automated batch-lease allocation logic

RESULTS:

- 40% reduction in administrative costs
- 100% audit accuracy (zero discrepancies in 6 months)
- Real-time financial visibility across 50+ pond operations
- Automated invoicing and payment tracking
- NBR-compliant Chart of Accounts tailored for aquaculture industry

- ✓ CORE SERVICES OFFERED
1. MANAGER.IO IMPLEMENTATION & MIGRATION
  - Fresh installation from zero to fully operational
  - Migration from Excel, QuickBooks, or other systems
  - Custom Chart of Accounts designed for Bangladesh tax law
  - Training and documentation for your team
  - Ongoing support and optimization
2. EXPORT INCOME DOCUMENTATION
  - ERQ account setup and compliance
  - Freelancer/exporter financial structuring
  - International payment tracking (USD/BDT reconciliation)
  - Documentation for BRAC Bank, Islami Bank, Dutch-Bangla Bank
  - Government Freelancer ID eligibility preparation
3. FINANCIAL REPORTING & NBR COMPLIANCE
  - Monthly/quarterly financial statements
  - VAT return preparation and filing
  - Tax compliance audits
  - Profit & loss analysis
  - Cash flow forecasting
4. GITHUB AUTOMATION FOR ACCOUNTING
  - Automated Manager.io data backups via GitHub Actions
  - CI/CD workflows for financial reporting
  - Integration with Notion, Slack, or email notifications
  - Zero-downtime backup strategies
  - Version control for accounting data
5. SAAS INTEGRATION & WORKFLOW OPTIMIZATION
  - Dub.co link attribution for affiliate programs
  - Proton secure email setup for business communications
  - Notion database sync for project management
  - Custom API integrations between platforms

✓ WHY CHOOSE ME?

DEEP TECHNICAL EXPERTISE: I'm not just an accountant—I'm a systems architect. I understand GitHub, APIs, automation, and cloud infrastructure. This means I can build solutions other accountants can't even imagine.

BANGLADESH-SPECIFIC KNOWLEDGE: I understand the unique challenges of operating in Bangladesh:

- NBR tax compliance requirements
- Bangladesh Bank export regulations (ERQ, Form C, remittance documentation)
- Local banking procedures (BRAC, Islami, Dutch-Bangla)
- Government Freelancer ID pathways
- Trade license and e-TIN integration

EXPORT BUSINESS FOCUS: If you're earning from international platforms (Upwork, Fiverr, Dub.co, Manager.io affiliates, Proton), I know exactly how to structure your accounting to maximize compliance and minimize friction.

PROVEN TRACK RECORD: My work isn't theoretical. I have live implementations running right now, generating real results for real businesses.

✓ IDEAL CLIENTS

You're a perfect fit if you are:

- A Bangladesh-based manufacturing or agro-industry business
- An exporter or freelancer earning USD income
- A business migrating from manual Excel bookkeeping
- A startup needing NBR-compliant accounting from day one
- A company requiring GitHub-based automation and backup strategies

✓ MY PROCESS

PHASE 1: DISCOVERY (Week 1)

- Understanding your business model, revenue streams, and pain points
- Reviewing existing financial records
- Identifying compliance gaps and optimization opportunities

PHASE 2: DESIGN (Week 2)

- Custom Chart of Accounts tailored to your industry
- Workflow mapping (invoicing, expenses, payments, reconciliation)
- Integration architecture (GitHub, Notion, Slack, etc.)

PHASE 3: IMPLEMENTATION (Weeks 3-4)

- Manager.io installation and configuration
- Data migration (if applicable)
- Automation setup (GitHub Actions, webhooks, API integrations)
- Team training and documentation

PHASE 4: OPTIMIZATION (Ongoing)

- Monthly financial reporting
- Performance monitoring and adjustments
- Compliance audits
- Feature enhancements as your business scales

- ✓ TECHNICAL SKILLS
- Manager.io (Expert)
  - Cloud Accounting Architecture
  - GitHub / GitHub Actions
  - API Integration (REST, Webhooks)
  - Python for Automation
  - Notion Database Design
  - Bangladesh Tax Law (NBR)
  - Export Documentation (ERQ, Form C)
